## Physician–Scientist Faculty Position

<b>Company/Institution:</b>	Washington University School of Medicine		
<b>Department:</b>	Hematology		
<b>Location:</b>	St. Louis, MO, USA		
<b>Degree Requirements:</b>	MD	<b>Salary:</b>	Not available
<b>Job Type:</b>	Faculty	<b>Posted:</b>	April 3, 2017
<b>Job Setting:</b>	Medical School	<b>Application Period:</b>	April 3–September 2, 2017

The Hematology Division of the Washington University School of Medicine in St. Louis invites applications for a physician scientist at the level of Assistant Professor on the tenure track or Associate Professor with tenure. Candidates should have an M.D. degree or combined M.D./Ph.D. The successful applicant will establish an independent, laboratory–based basic research program and will participate in the in–patient and consult services at Barnes–Jewish Hospital; establishment of an outpatient clinic will be optional. The hematology service sees a broad range of patients with classical hematological problems, including bleeding and thrombotic disorders, myeloproliferative neoplasms, bone marrow failure syndromes, autoimmune hematologic diseases, and hemoglobinopathies. The hematology service does not treat patients with lymphoma or acute leukemia or perform bone marrow transplantation, although there are close collaborations with clinicians that perform these services as part of the joint Hematology/Oncology fellowship program. Current Hematology Division faculty members conduct a wide range of biomedical and basic science research (see <http://hematology.wustl.edu/>). The successful candidate will receive a generous start–up package, excellent laboratory space, and guaranteed protected time to perform research. Faculty members have access to state-of–the–art clinical and basic science core facilities, including microarray, proteomics and mass spectrometry, cyTOF and mass cytometry, biomedical informatics, and mouse transgenics. Access to tissue banking at the Siteman Cancer Center, genome engineering at the Genome Engineering & iPSC Center, and sequence analysis at the world renowned Genome Institute are additional assets.

### About the Employer

Washington University School of Medicine and Barnes–Jewish Hospital are located in St. Louis, Missouri, a metropolitan area of 3 million. Washington University School of Medicine is consistently ranked among the top medical schools in the United States. Barnes–Jewish Hospital is a 1,050 bed hospital with state–of–the–art facilities for all aspects of patient care.

### How to Apply

Please send curriculum vitae and a letter of inquiry to the Chair of the Search Committee (email is preferred). ## BC/BE Hematologist

<b>Company/Institution:</b>	Washington University		
<b>Department:</b>	Hematology		
<b>Location:</b>	Saint Louis, MO, USA		
<b>Degree Requirements:</b>	MD	<b>Salary:</b>	Not available
<b>Job Type:</b>	Faculty	<b>Posted:</b>	October 4, 2016
<b>Job Setting:</b>	Medical School	<b>Application Period:</b>	March 27–August 27, 2017

The Hematology Division of the Washington University School of Medicine in St. Louis is seeking a clinical researcher or clinician educator to be appointed at the level of Assistant Professor or Associate Professor. He/she will staff an outpatient hematology clinic, attend on the hematology inpatient and consult services, assist in the teaching of medical students, medical house staff, and hematology/oncology fellows, and participate in patient-oriented clinical research. The hematology service sees a diverse population of patients with classical hematological problems, including sickle cell anemia and other hemoglobinopathies, bleeding and thrombotic disorders, myeloproliferative neoplasms, bone marrow failure syndromes, and autoimmune hematologic diseases. The hematology service does not treat patients with lymphoma or acute leukemia or perform bone marrow transplantation, although there are close collaborations with clinicians that perform these services as part of the joint hematology/oncology fellowship program. Faculty in the Division of Hematology collaborate with faculty in the Division of Pediatric Hematology in expanding programs in sickle cell disease and hemophilia. The Division's close working relationship with Clinical Pathology/Transfusion Medicine also facilitates clinical and academic collaborations. Current Hematology Division faculty members conduct a wide range of clinical and basic science research (see <http://hematology.wustl.edu/>). The Division and Office of Faculty Affairs (see <https://facultyaffairs.wusm.wustl.edu/>) provide extensive resources for mentoring junior faculty.
